

External Evaluation of ASHAs (Mitanin) for Practical Assessment

For Skills including Rapid Diagnostic Testing for Malaria

Report by

National Institute of Open Schooling, Regional Centre, Raipur

July 2018- July 2019

The external evaluation of ASHA (Mitanin) has been done of 514 Mitanins. The external evaluations had two parts, one is written test and another is practical assessment. The Practical exam had 40 marks and consisted of 8 skills of 5 marks each. The ASHA/ASHA Facilitator was evaluated on a set of skills from the listed competencies in the ASHA modules. The checklist for Practical assessment (annexure 1) has been developed in the same pattern of evaluation as that of State and District ASHA trainers in order to maintain the standardization and uniformity in the overall evaluation process.

The modality of conducting the practical assessment is as follows:

The practical assessment was conducted in 6 skill corners established for the skills demonstration. Skills corner should have required quantity of material/equipments necessary to perform the demonstration.

The Practical assessment has been divided into 2 parts-

- A. Skill test I(Compulsory Skills) and
- B. Skill test II (Random Skills)

A. Skill test I (Compulsory Skills)

This section comprises of six (6) Compulsory skills of 30 marks and was performed by the ASHA through demonstration. Each of the skill carries 5 marks and was involve steps, which needs to be performed in a correct sequence. The details of skills are mention in the table below-

Sl. No.	Name of the skills	Skill corner	Maximum Marks	Materials required
1	Hand washing	1 st skill corner	5	soap and sink with running water
2	Temperature	2 nd Skill corner	5	Digital thermometer,

	measurement			spirit, cotton and mannequin
3	Newborn weighing	3 rd Skill corner	5	Weighing scale and mannequin
4	Keeping the Newborn warm	4 th Skill corner	5	Soft moist cloth, dry cloth
5	Preparation of ORS.	5 th Skill corner	5	ORS packet, clean water, spoon and glass, Jar/utensil
6	Diagnosing Pregnancy using Nischay Kit	6 th Skill corner	5	Nischay Pregnancy Kit Urine sample (positive)
	Total		30 marks	

Method:

- (i) All the ASHAs had to demonstrate the six skills, one by one.
- (ii) Each of the 6 skill corners had one evaluator for assessment. ASHAs were demonstrating the required skill in that skill corner, one by one and proceed to the next skill corner. This was continuing till each ASHA had demonstrated all the 6 skills. In this way, the assessment was simultaneously conducted in the 6 skill corners.
- (iii) Each skill and steps involved in the skills are standardized by giving them equal marks. This indicates that
 - **Full marks for the step:** If done as per the Standards
 - **No marks for the Step:** Not done as per the Standards or any missing step

B. Skill test II (Random Skills)

The Random skills comprises of two (2) skills of 10 marks was done through viva or demonstration. Each skill is of 5 marks and it was required the ASHAs to perform the skill involving steps to be done in a correct sequence. Each of the steps will also carry marks. The skills are-

Viva	Demonstration
<ul style="list-style-type: none"> • Tracking beneficiaries and updating MCH card • Diagnosing the Last Menstrual Period (LMP) and calculating Expected Date of Delivery (EDD) • Observation of baby at 30 seconds and 5 minutes for movement of limbs, breathing and crying • Conduct examination of new born for abnormality • Provide care of eyes and umbilicus 	<ul style="list-style-type: none"> • Diagnosing of Malaria – using RDT Kit • Diagnosing of Malaria - using Blood smear test.

<ul style="list-style-type: none"> • Counsel for exclusive breastfeeding • Ability to identify hypothermia in newborns • Diagnose and management of newborn sepsis • Weighing of children below five years of age- assessing grades of malnutrition. • Diagnosis of dehydration and ability to ascertain if referral is required. • Skill to make adaption of the message of six essential feeding advises to each household. • Signs of Acute Respiratory Infections (ARI) – fever, chest in drawing, breath counting; and ability to manage mild Vs moderate ARI with CTM, and refer the severe ones. • Skill in counseling the mother for feeding during diarrhoeal episode • Testing for anaemia and ensuring appropriate treatment • Counsel for delay in age of marriage, delay in age of first child bearing and in spacing the second child. 	
--	--

NOTE: MATERIALS REQUIRED FOR THE ABOVE SKILLS WAS AS PER THE CHECKLIST DEVELOPED

Method:

- (i) **All the skills under the Random list were made into chit shaving the skill name and number as provided in the Index list.**
- (ii) **From the given chits, each ASHA had to pick up and perform any two skills, either by Viva or demonstration.** Each ASHA had demonstrated the two selected skills in that skill corner and the evaluator was scored them accordingly as per the checklist provided.
- (iii) Each of the skills carries 5 marks. The ASHA was assessed based on the standardized steps involved in the skills i.e.
 - **Full marks for the step:** If done as per the Standards
 - **No marks for the Step:** Not done as per the Standards or any missing step

Detailed Skill Checklists: Annexure 1

Result of skill test of Mitanins: Annexure 2

Annexure 1 – Skill Checklist

Hand Washing - Demonstration Name of Evaluator-

	Checklist	Marks allocated	Score-ASHA	Score-ASHA	Score-ASHA	Score-ASHA	Score-ASHA	Score-ASHA	Score-ASHA
1	Remove rings, bangles and wrist watch	0.5							
2	Wet hands and forearm up to elbow and fingers	0.5							
3	<i>Apply soap on wet hands and forearm up to elbow and fingers-</i>	(02)							
i	Scrub hands	0.5							
ii	Scrub fingers/ thumbs	0.5							
iii	Scrub wrist	0.5							
iv	Scrub forearm	0.5							
4	Wash your hands thoroughly with clean water	0.5							
5	Do not use towel or any cloth to dry the hands	0.5							
6	Air-dry with hands up - elbow facing the ground	0.5							
7	Do not touch the ground or dirty objects after washing hands	0.5							
	Total	05							

Temperature Measurement– Demonstration Name of Evaluator-

	Checklist	Marks allocated	Score-ASHA	Score-ASHA	Score-ASHA	Score-ASHA	Score-ASHA	Score-ASHA	Score-ASHA
1	Take thermometer out and hold at broad end	0.5							
2	Clean the shining tip with cotton ball soaked in spirit	0.5							
3	Press the button to turn on thermometer. You may see “188.8” flash in the centre of the display window, then a dash (-), then the last temperature taken and then three dashes (---) and a flashing “F” in the upper right corner.	0.5							
4	Hold the thermometer upward and Place the shining tip in the centre of the armpit.	0.5							
5	Place your arm to support baby’s arm. Do not change the position	0.5							
6	Look at the display and Wait till continuous beeps are heard	0.5							
7	Remove thermometer if “F” stops flashing and number stops changing	0.5							
8	Read and record the temperature	0.5							
9	Turn off thermometer by pushing the round or colored button	0.5							
10	Clean the shining tip of the thermometer with a cotton ball soaked in spirit and Place thermometer back in the case	0.5							
	Total	05							

Weighing the newborn – Demonstration Name of Evaluator-

	Checklist	Marks allocated	Score-ASHA	Score-ASHA	Score-ASHA	Score-ASHA	Score-ASHA	Score-ASHA	Score-ASHA
1	Place the sling on scale	0.5							
2	Hold scale by top bar keeping the adjustment knob at eye level	0.5							
3	Turn the screw until its top fully covers the red and '0' is visible	0.5							
4	Remove sling from the hook and place it on a clean cloth placed on the ground/cot/table	0.5							
5	Place baby with minimum clothes in the sling and put the sling on hook	0.5							
6	Holding top bar carefully, as you stand up, lift the scale and baby off the ground till the knob is at eye level	0.5							
7	Read the weight	0.5							
8	Gently put the sling with baby in it, on the ground/cot/table and unhook the sling	0.5							
9	Gently take out the baby from the sling and hand over to the mother	0.5							
10	Record the weight and inform the mother about baby's weight	0.5							
	Total	05							

Keeping the newborn warm – Wrapping the baby – Demonstration Name of Evaluator-

	Checklist	Marks allocated	Score-ASHA	Score-ASHA	Score-ASHA	Score-ASHA	Score-ASHA	Score-ASHA	Score-ASHA	Score-ASHA	Score-ASHA
1	Keep the room warm: (warm enough for adults)	0.5									
2	Close all windows in the room	0.5									
3	Before wrapping the baby make sure baby is dry	0.5									
4	Make sure baby is clothed properly and head is covered	0.5									
-5	Take a clean blanket Fold it from its top edge	0.5									
-6	Gently keep the baby on the blanket	0.5									
7	Cover the baby's head with the folded edge	0.5									
8	Wrap baby's foot with the blanket	0.5									
-9	Cover baby from either side of the blanket	0.5									
10	Give the baby back to mother and advise her to keep the baby close to herself	0.5									
	Total	05									

ORS preparation – using ORS packet and home-based ORS- Demonstration Name of Evaluator-

	Checklist	Marks allocated	Score-ASHA	Score-ASHA	Score-ASHA	Score-ASHA	Score-ASHA	Score-ASHA	Score-ASHA
	Using ORS packet								
1	Check the expiry date of the ORS Packet and ensure that the ORS packet is not damaged	0.5							
2	Pour all the ORS powder into a container having capacity of 1 litre	0.5							
3	Measure 1 litre of clean drinking water (preferably boiled and cooled)	0.5							
4	Stir well until the powder is mixed thoroughly and check if the solution tastes like tears	0.5							
5	Inform the family that ORS should be stored in a closed container and should be used within 24hours of preparation.	0.5							
	Sub total	2.5							
	Home based ORS								
1	Measure one glass (200 ml) of clean drinking water (preferably boiled and cooled)	0.5							
2	Add one leveled tea spoon of sugar in the glass of water	0.5							
3	Add one pinch (taken with three fingers) of salt in the glass of water	0.5							
4	Stir well until the powder is mixed thoroughly and check if the solution tastes like tears	0.5							
5	Inform the family that ORS should be stored in a closed container and should be used within 24hours of preparation.	0.5							
	Sub total	2.5							
	Total	05							

Diagnosis of Pregnancy using Nishchay Kit - Demonstration Name of Evaluator-

	Checklist	Marks allocated	Score-ASHA	Score-ASHA	Score-ASHA	Score-ASHA	Score-ASHA	Score-ASHA	Score-ASHA
1	Collect the morning urine in clean and dry glass or in a plastic bottle	0.5							
2	Check for expiry date of the kit and ensure that the kit is intact	0.5							
3	Keep the Nishchay kit on a flat surface	0.5							
4	Take two drops of urine in the sample well	0.5							
5	Wait for 5 minutes	0.5							
6	If two violet color lines come in the test region (T), then the woman is pregnant	0.5							
7	If the violet colour line in the test region (T) is one only, then the woman is not pregnant	0.5							
8	Dispose the used Nishchay kit properly	0.5							
9	Depending on the following results of the test what advice will you give to the woman-	(1)							
	Negative result – Advice on family planning methods and help her choosing the most appropriate method	0.5							
	Invalid result- Repeat the test	0.5							
	Total	05							

Diagnosis of Malaria – Demonstration Name of Evaluator-

a) Rapid Diagnostic Test (RDT) Kit

	Checklist	Marks allocated	Score-ASHA	Score-ASHA	Score-ASHA	Score-ASHA	Score-ASHA	Score-ASHA
1	Check for expiry date of the kit. Open the foil pouch and check that the desiccant inside is still blue. If not, discard the test. Remove the test strip and the small tube or loop from the foil pouch and place them on clean dry surface Take out the buffer solution and the dropper. Place a new test tube in the multiple well plate	0.5						
2	Select the second or third finger of the left hand. Select the site of the puncture: Side of the ball of the finger, not too close to the nail bed	0.5						
3	Make a puncture at the site Allow the blood come up automatically. Do not squeeze the finger	0.5						
4	Place lancet in trash container	0.5						
5	Touch the tip of the tube or the loop to the blood drop on the finger and Let a small quantity of blood (a small drop) come up in the tube or the loop	0.5						
6	Touch the tube or the loop to the test strip just below the arrow mark to place the blood there. <i>If there is a paper, where Plasmodium falciparum is written, remove it and place the blood, where it was</i>	0.5						
7	Place tube/loop in the trash container	0.5						
8	Using the dropper, place 4 drops of buffer solution into a new test tube	0.5						
9	Now place the test strip containing blood in the buffer solution with the arrow pointing down.	0.5						
10	Observe after 15 minutes and record the result Place test strip and test tube in the trash container	0.5						
	Total	05						

b) Blood Smear Name of Evaluator-

	Checklist	Marks allocated	Score-ASHA	Score-ASHA	Score-ASHA	Score-ASHA	Score-ASHA
1	Select the second or third finger of the left hand. Select the site of the puncture: Side of the ball of the finger, not too close to the nail bed	0.5					
2	Make a puncture at the site: Allow the blood come up automatically. Do not squeeze the finger	0.5					
3	Hold the slide by its edges	0.5					
4	Touch the drop of blood with a clean slide from below. Collect three drops for thick smear	0.5					
5	Touch another new drop of blood with the edge of a clean slide for preparing the thin smear	0.5					
6	Spread the first drop of blood with the corner of another slide to make a circle or a square about 1cm to make the thick smear	0.5					
7	Bring the edge of the slide carrying the second drop of blood to the surface of the first slide, wait until the blood spreads along the whole edge	0.5					
8	Push the slide forward by holding it at an angle of about 45° with rapid but not too brisk movement to make the thin smear	0.5					
9	Write with a pencil the slide number on the thin film, Wait until the thick film is dry	0.5					
10	Dispose of the lancet and cotton swabs in the trash container	0.5					
	Total	05
